

Why we now have a natural herd immunity and should resume normality at once!

Covid-19 has been amongst us for around 14 months, pandemics usually last around 12 months! *6 months elapsed* before anything was done to try and mitigate the effects of the virus which were fruitless. Masks have been shown to be ineffective due to the microscopic size of the virus and the badly fitting of masks. No additional hand washing occurred in the first six months, coughing without covering the mouth spread the virus easily, as did using and handling the same mask frequently, handling mobile phones after removing mask, frequent handling of masks and phones, then personal belongings, handling food products and tinned foods and goods in shops, supermarkets, trolleys, baskets, petrol stations, pubs, handrails, handles and door handles, outdoors, indoors, in taxis, buses, trains and stations, cinemas, football and rugby grounds, boxing arena's, cinema's and theatres, restaurant, cafes, hotels, public toilets, family gatherings, church meetings, opera's, all places of employment, doctors surgeries, health centres, hospitals, everywhere. Millions of carefree school children freely spreading it around everywhere, coins and notes, newspapers, as well as untold millions of people from around the world entering the country, via Airports and aeroplanes, where for the first 6 months of the virus no effective sanitisation was used. Touching, kissing and hugging and more personal physical contact. All of the above has applied to virtually all of the population on so many, many occasions in the first six months alone, and again for a further 8 months during ineffective government lock-downs.

Despite this phenomenal spread of the virus over 14 months, we like Sweden who also have reached a natural herd immunity do not have any more deaths than most other years, proving that this virus is not pandemic.

Covid-19 facts.

1. Covid-19 is a highly contagious, highly transmissible corona virus
2. The virus has been here around 14 months.
3. Having the virus gives us 100% immunity for a long period of time.
4. Most people have now had the virus!
5. Most people got none or very mild symptoms
6. Asymptomatic spread of covid-19 does not occur
7. Masks offer little effectiveness at stopping the transmission of the virus
8. Masks may cause bacterial infection of face and lungs.
9. PCR & L.F tests are unfit for purpose and have been shown to be unreliable.
10. Lock-downs & tiers do not work, they cause great economic damage, suffering and death.
11. The majority who die from covid, are very old and have pre-existing health conditions.
12. Ventilators have cost lives.
13. Vitamin D3, C & Zinc have proven effective in the prevention & treatment of covid-19
14. Homoeopathy has proven effective in treating Covid-19
15. Hydroxychloroquine plus zinc has proven effective in treating Covid-19
16. There are sufficient alternatives to use in preference to the unpredictable poorly tested rushed experimental genetic chemical injections.
17. Rushed experimental genetic chemical injections which have cost lives, caused severe reactions, and have had very little if any testing done on the most elderly who are most at risk, offer very little, balanced against known and unknown dangers.
18. These rushed poorly tested experimental genetic injections are that safe they need an indemnity to protect the manufacturers from being sued for the damage they are doing, and may do in the medium and long term as well.
19. The government are by their actions, using the old and vulnerable as guinea pigs to do the testing they have allowed the manufacturers to get away with.

20. Time has shown that politicians cannot deal with covid type health matters in a fair and democratic manner, maintaining the rights and freedoms of all the people, or take proper responsibility for the financial implications of their poor choices regarding Track Trace, PCR testing, furlough, destruction of small to medium businesses, lock-downs, PPE, ventilators, vaccines.

Contagious, literally “communicable by contact,” describes a very easily transmitted disease as influenza or the common cold. Infectious refers to a disease involving a microorganism that can be transmitted from one person to another only by a specific kind of contact; related terms: **transmittable, infectious, communicable, transmissible**. (Norovirus is one which seems to have disappeared off the radar probably because of the new standards of covid hygiene in care homes and hospitals!)

What does **highly contagious** mean?

(of a disease) able to be caught by touching someone with the disease or something the person has touched or worn, or (of a person) having this type of disease: a **highly contagious** strain of flu.

fig. **Contagious** also **means** moving easily from one person to another:

IF;

If the test works - Why the false positives?

If the masks work - Why the 6 feet?

If the 6 feet works - Why the masks?

If all three work - Why the lock-downs?

If having the virus give us 100% protection - why no freedom?

If all five work - Why the vaccine?

If the vaccine is safe - Why the 'no Liability Clause'?

If the vaccine is effective – why the masks and why the Tiers?

If correct amounts of Vitamin D, C, Zinc work – why no supplementation's?

If hydroxychloroquine plus zinc works - why is it withheld?

If homoeopathy works - why is it unused?

If contagious – why no gloves?
